4.1 Subscribing to Mantano Cloud **64**

4.1.1 Creating my Account 64

4.1.2 Subscribing 65

4.1.2.1 Paying through the Paypal system 65
4.2 How to start using Sync in Mantano Reader? 66
4.2.1 On device A (one of your devices) 66
4.2.2 On device B (another of your devices) 67
4.3 In Mantano Cloud, show your documents and annotations: 68
4.3.1 Managing items in Mantano Cloud 68
4.3.1.1 Filtering the displayed items according to their status in Mantano Cloud 68
4.3.1.2 Synchronizing items to Mantano Cloud 69
4.3.1.3 Archiving items in Mantano Cloud 69
4.3.1.4 Removing items from Mantano Cloud 70
4.3.1.5 Synchronizing reading status and annotations beetween devices for DRM protected books 70
4.4 Setting the Synchronization options in Mantano Reader 71
4.5 Showing my books and annotations in Mantano Cloud 71
4.5.1 Using filters 72
4.5.2 Showing and managing my books 72
4.5.3 Showing and managing my annotations 72
4.6 Sharing books and social reading 73
4.6.1 Sharing and unsharing books 73
4.6.1.1 From Mantano reader 73
4.6.1.2 From the Mantano Cloud website 74
4.6.2 Seeing others' annotations while I read a book 75
4.7 Managing my contacts 75
4.7.1 Adding contacts 75
4.7.2 Accepting or declining friend requests 76

4.7.2.1 From Mantano Reader 76
4.7.2.2 From Mantano Cloud 76
4.8 Accepting or declining sharing 76
4.8.1.1 From Mantano Reader 76
4.8.1.2 From Mantano Cloud 77

1 Introduction

Mantano Reader for Android is a powerful and user-friendly reader application for PDF and EPUB documents, supporting the Adobe DRM technology. It is compatible with any Android 4.0+ smartphone and tablet.

The Premium Edition includes a full feature set to make your reading memorable:

- Advanced document navigation (synchronized Table Of Contents, Bookmarks, full-text search…)
- Highlights, underlines, cross out, text and graphical annotations
- Online and offline dictionaries, personal lexicon
- Text-To-Speech
- Advanced PDF support, including automatic and manual margins removal, width adjustment to one column for multi-column documents, zooming and shifting (Pan & Zoom)...
- Advanced EPUB support, including customizable themes, Day / Night switching and zoom in pictures
- Customizable gestures

Some *management* functions such as Collections, Tags, Filters and Search help you to easily organize and find your books and annotations.

Any special thought while you are reading? Any interesting excerpt in your document? A comment to add? The Annotation features will give you the opportunity to highlight an excerpt and optionally attach a comment or sketch.

Mantano Reader is compatible with the Open Publication Distribution System (OPDS) catalog standard. This means that you can easily browse through hundreds of online free or paid catalogs such as the Internet Archive or arXiv, and download any electronic book you discover into your personal Library. Mantano Reader comes with a few famous OPDS catalogs predefined but you can also very easily add and manage your favorites OPDS “feeds”.

Mantano Reader is compatible with Mantano Cloud (http://cloud.mantano.com). Create an account on Mantano Cloud and:

- Switch between your phone and tablet and always find your books, annotations, notes, reading positions along with you
- Transform your books and documents into digital reading circles by sharing annotations and learn from each others' experience.
    - See notes from your contacts during your reading
    - Comment the notes of others
    - Include notes of others in your review sheets (Premium version only)

2 Mantano Reader Premium modules

Mantano Reader Premium provides access to Home screen and 3 main modules:

Books / Notes / Stores

You can navigate between them thanks to the tabs in the header area.

The home screen

It offers quick access to:

- Your friend requests to accept
- Your current reading
- Pending invitations to "shared reading" that was sent to you
- The new books from one of our partner bookstores

2.1 Global structure of the “Books” and “Notes” modules

The “Books” and “Notes” modules are very similar with respect to their structure and behavior. They include:

- A header which contains controls to change the sort criterion and order and to select items, an information label on the current filter and the number of available elements;
- A central area, which contains a list of items. The way these items are displayed can be changed, from a list with detailed information to a simpler view with only covers and titles;
- A toolbar at the bottom;
- A retractable filters panel on the left that allows direct access by collection, tag, author, format ...

2.1.1 The header

Two display options (sort criterion / order) and one selection control are present in this header, just below the tabs, as explained in the following table:

Icon	Function / Operation
	Change the display order in an ascending or descending order
	Sort the displayed list by the title, author or other criteria for which an alphabetical order applies
	Select / unselect all items

2.1.2 The toolbar

The toolbar contains icons that allow triggering general operations, such as adding new books, changing the display mode or the items order…

The toolbar is located at the bottom of the display, on both smartphones and tablets:

> Caution: The toolbar can scroll horizontally. On small displays, not all the options can be visible at the same time. In such a case, scrolling with a lateral swipe on the toolbar will reveal more options.
>
> Hint: You can click on the “Search” button of your device (if any) to quickly access the search option of the active module.

Some functions apply to specific items: classify, tag, remove, etc… They are accessible only when they can apply, i.e. when at least one item is selected.

- The "general toolbar" buttons are replaced by the available options, and is also scrollable if the display is too small to display all the options available:

2.2 Common commands for books and annotations lists

2.2.1 When no item is selected

Icon	Function / Operation
	Change the display mode (Chose the "List", "Details", "Thumbnails"…)
	Please refer to "2.5.1 How to search items in lists?" section
	Please refer to the "4.3.1.1 Filtering the displayed items according to their status in Mantano Cloud" section
	Please refer to the "4.2 How to start using Sync in Mantano Reader?" section

	Allows you to access the application's settings, including preferences such as: Adobe DRM, Labels of Buttons, Library, Reading, Dictionaries… Access to Customer Support sections

2.2.2 When items are selected

Icon	Function / Operation
	Please refer to "3.2 Sharing books, selected text and annotations through my other applications" to know more about the Share functions.
	Please refer to the "2.5 How to delete items in lists?" section
	Add tags to one or several items in the same time. Please refer to the "2.3 Classifying and indexing the books and notes" section.
	Arrange Please refer to the "2.3 Classifying and indexing the books and notes" section
	Remove from a collection Please refer to the "2.3 Classifying and indexing the books and notes" section
	Please refer to the "4.3.1.3 Archiving items in Mantano Cloud" section

Please refer to the "4.3.1.2 Synchronizing items to Mantano Cloud" section

Please refer to the "4.3.1.4 Removing items from Mantano Cloud" section

2.3 Classifying and indexing the books and notes

You can organize and classify your contents in order to quickly retrieve a specific element thanks to two slightly different tools: tags and collections. Both are additional pieces of information (meta-data) associated to a book or a note:

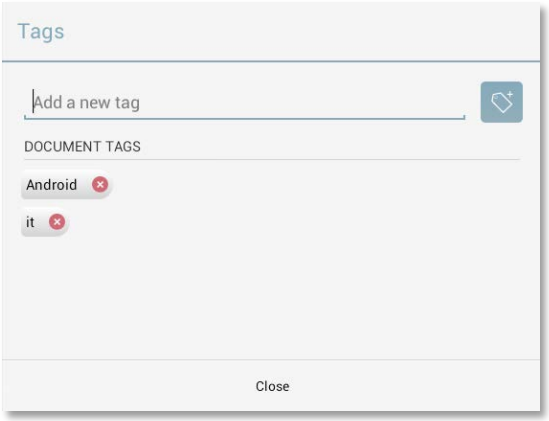
- A **tag** is an arbitrary string label and can be associated with several elements;
- A **collection** is like a tag, an arbitrary string label and can be associated with several elements. However:
    - Unlike tags, a collection can contain sub-collections: collections allow to create arbitrarily nested structures
    - An element (book or note) can be inserted into several collections.

Like other metadata, tags and collections can be renamed (see "Using filters" below).

2.3.1 How to associate tags to an element?

Tags are created on the fly, when they are associated to an element. Managing the tags associated to an element is straightforward:

- Click on under the document title to open the ***Tags Management*** popup:



- Enter the tag name. While you type, Mantano Reader suggests existing tag names. You can select one of them to use an existing tag, or type a new tag name.
- Click on the Add icon
- Click on the Close button to validate and save
- The new tag will be added to the item's tag list
- To delete a tag, simply click on located close to the tag name.

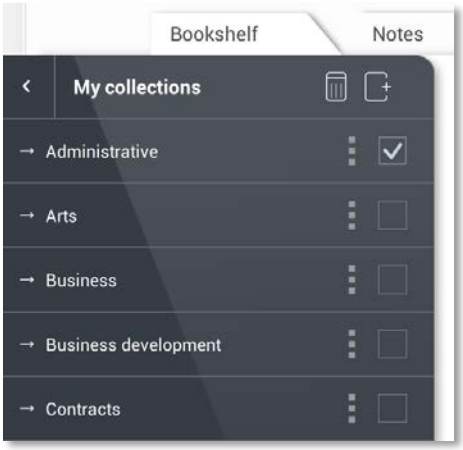
2.3.2 How to create a collection or a sub-collection?

While tags are created on the fly when you associate them with elements, collections can be created on the fly too, but they can also be created beforehand, before associating elements to them. There are several possible ways to create a collection:

- By pressing the «Plus» icon under the "My collections" label in the left column of the "Books" or "Notes" sections on tablets, or in the "Filter/Collection" panel on smartphones

- *On smartphones, swipe from left to right or tap on the* *button in the header, or press the back button of the phone to show the "Filter panel". By default, the filter panel opens on the filter Collections.*

In the Collections Manager screen, which you access by taping on the icon:

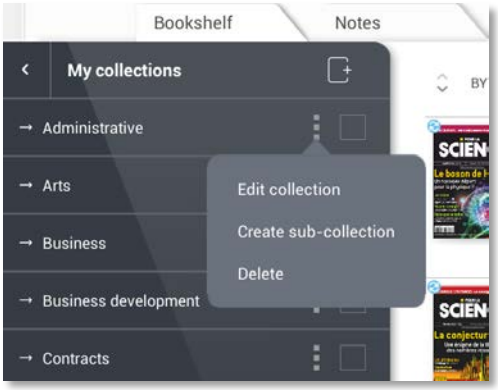


Then by pressing the «Plus» icon next to "My collections" in the top right side of the screen.

In both cases, a popup window opens where you can type the name of your collection or sub-collection and select its parent collection in the Parent spinner (by default, the parent is *My collections*). You save your new collection by pressing the Create button.

When you are in the Library Manager screen, the default parent collection is the current collection (colored bar on the left edge of the thumbnail in the tree of collections). If you want to create a sub-collection with a different parent from the default one, you can change it with the Parent spinner.

Another way to create a sub-collection in the Library Manager is to check the box next to the desired parent collection and to tap on the down arrow besides to open the drop-down menu where you can select «Create sub-collection»:



You exit the Collections Manager by tapping on OK on the top left of the screen.

2.3.3 How to add an item to a collection?

1. In the main screen, when you are in list view or details view, check the boxes corresponding to the books or notes that you want to add to a certain collection. Then:

   - Tap the icon in the toolbar

2. A window opens where you can choose the collection or sub-collection where you want to add the items, in the collapsible tree of collections.

3. In this window, you can also create the collection «on the fly» thanks to the «Create» button.

2.4 Browsing the lists by using filters

Filters are available in the “Books” and “Notes” sections. By default, the selected filter is “Collections”.

To select a filter, tap on “Collections” on the top left of the side panel in the main screen of the section, and choose in the drop-down list.

The filters are different in the “Books” and “Notes” sections:

- In “Books”: Collections, Tags, Authors, Publishers, Series, Languages, Formats, Ratings, Folder;
- In “Notes”: Collections, Tags, Book, Type.

The following metadata types can be renamed directly:

- Tags
- Authors
- Publishers
- Series
    - Please note that for creating series you must fill the two input areas.

To rename such metadata, follow these steps:

1. On a phone, drag from left to right to show the Filters side panel
2. Select one of the aforementioned metadata types by clicking on the “Collections” label at the top of the panel
3. Long press on the metadata you want to rename
4. A popup appears and allows you to rename the metadata

5. If the new name matches an existing one, both will be merged.

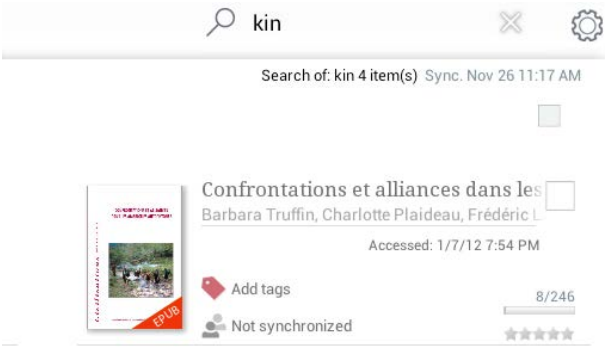
2.5 How to delete items in lists?

- Select the items to remove with the checkbox close to the item, or the "select all" button in the header bar;
- Click on the icon in the toolbar;
- Confirm.

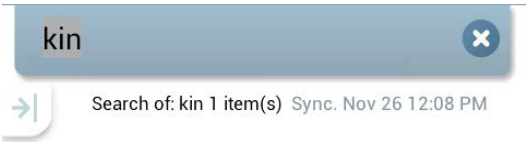
2.5.1 How to search items in lists?

- Click on the standard "Search" button of your device (some devices do not have such a button) or on the "Search" button in the toolbar (or in the upper right corner on some devices). The search panel appears as shown below:

In tablets



In smartphones



- Enter the word you are looking for;
- Results appear gradually as you type the word ;

2.6 “Books”: managing your library

The Library module (“Books”) lists all the EPUB and PDF documents present in your library.

By default, all these electronic documents are listed with some information:

- Title or File name, Author, Addition Date or Last Access, Expiration date for eBooks
- Tags (Please refer to the What are Tags and how to use them for more information about Tags)
- Reading completion rate (based on the last page read)
- Rating

Apart from this “default view”, other views are available:

- List
- List with details (the default view)
- Thumbnails (small / medium / large)

2.6.1 Managing your list of documents

Beyond the common functions that have been described in the previous section ("2.2 Common commands for books and annotations lists"), additional functions are available in the Library.

These options are available in the toolbar:

Icon	Function / Operation
	Launch the synchronization between the files stored in the device and the items listed in the library (by default all files in the root folder will be scanned but you can select the folders to scan when synchronizing in the application's Settings)
	Open the file explorer and select folders and files you want to import or share. In the Premium version you can choose from your device or from your Dropbox account.

2.6.2 How to read an eBook or a PDF document?

Please refer to "3.1 Reading PDF / EPUB eBooks or documents" to discover more about the Reading functions.

2.6.3 How to share an eBook or a PDF document?

- With Mantano Cloud: please refer to section "4.6 Sharing books and social reading"
- Through my other applications: please refer to "3.2 Sharing books, selected text and annotations through my other applications".

NOTA:

- When importing eBooks, tags are automatically extracted from the eBook metadata.

- Modifications on tags will not update the eBook metadata.

2.6.4 How to change the cover or a metadata (title, authors,…) of an item

A long press on a book in the Library opens the Book Information window.

- If you tap on a label followed by the icon you can edit it.

- A long press on the cover image allows you to replace it with another one to choose in your own collection of images.

2.6.5 How to reattach a filte to a book

When the file of a book has been accidentally deleted from the device or moved to another folder with an external file manager, its thumbnail gets displayed in lighter colors on your Books.

Since the 2.4.2 version you can associate a file to the book on the Books again:

- either with a long press on the thumbnail to open the book information window and press the Search button near the access path of the previous file

- or by simply opening the book and press Search in the popup. Then you can navigate to the new location of the file on the device (in case of a deleted file you've downloaded the file again somewhere) and select it.

It is important to do this way instead of re-importing the book in the library because re-importing would only create a second entry on the Books, having no connection with the previous bookmarks, notes and highlights.

When you need to move the file of a book present in your library, you can do it with a long press on the thumbnail to open its information window and by pressing the Move button near the access path of the file in this window.

2.7 “Notes”: managing your notes and annotations

Mantano Reader allows creating standalone text or sketched notes. They can be attached to a page or a highlight in a document, or simply standalone.

It also allows storing words that have been looked up into a dictionary into a “personal lexicon”. The entries of this lexicon are also considered as annotations.

The “Notes” tab lists all the highlights, notes and annotations as well as the words from the personal lexicon.

All the notes are listed with some information:

- Title
- Creation date and time
- Tags (Please refer to “2.3 Classifying and indexing the books and notes” for more information about Tags)
- Page number if the note is attached to a book
- A thumbnail which depends on the type of note/annotation:

	Text		Sketch
	Lexicon entry		

- Additional book icon if it is attached to a book
- Additional picture icon if the annotation was not created by you but one of your contacts

2.7.1 Managing your list of notes

In addition to the common options described in "2.2 Common commands for books and annotations lists", a few additional functions are available in the toolbar of the "Notes" tab. Once again, the available options displayed depend on whether there are selected items or not.

2.7.1.1 Available options when no item is selected

Icon	Function / Operation
	Create a text note
	Create a freehand note
	Open the dictionary search popup. See the section "3.1.5 Using the dictionary and the personal lexicon" for details.
	Select the people from whom you want to see the annotations

2.7.1.2 Available options when one or more items are selected

Icon	Function / Operation
	Generate a “review sheet” including the selected notes/annotations. See the Export a note synthesis section.

2.7.2 How to create a note?

Please refer to “3.1.4 Creating and editing a note” to know more about the creation of notes.

2.7.3 How to share a note?

Please refer to “3.2 Sharing books, selected text and annotations through my other applications” to know more about the Sharing functions.

2.8 The « Stores » module

This module allows you to browse through hundreds of online free or paid catalogs compliant with the OPDS catalog format, and to download any electronic book you discover into your personal Library.

There are two lists of catalogs:

- Stores: Contains a list of commercial bookstores
- “My feeds”: Here you can add any OPDS Catalogs you want.

Some functions are available. The following table lists all icons and their functions:

Icon	Function / Operation
	Available from a specific catalog. Type the term you are searching. A results list or a web page appears with the results depending on the selected OPDS feed.
	Add a new OPDS Feed
	Visible only when at least one catalog is selected. Remove the selected OPDS Feeds

3 What can I do with Mantano Reader

3.1 Reading PDF / EPUB eBooks or documents

In the Library application, click on the document you want to read. It will be opened on the last read page or on the first page if not opened before.

3.1.1 Browsing through the document pages

There are different ways to browse the document pages:

- Swipe the current page
- Touch the left or right margins
- Use the scrollbar (to display it, press the Menu button of your device, or simply touch the center of the page)
- Click on the current page number to open the *Go to page* popup; enter the desired page number in the popup window; click on "OK"
- Touch the icon to go to back or to go to the next page in the navigation history.

3.1.2 Setting the display options with gestures

Some display options are controlled with finger gestures on the page:

- Swipe up / down to increase / decrease the font size (for EPUB or reflowed PDF)

- Pinch to zoom (for PDF)
- Double-tap on a block of text in a PDF document to zoom in / zoom out and adjust the zoom level so that the width of the block fits the entire display
- Drag the page with your finger to move around (in a PDF)
- Swipe up/down on the left border to increase/decrease the screen brightness

The “Display Settings” icon controls other display options, as described below.

3.1.2.1 Tips to read PDF documents

When reading a PDF document, there are a few tips to know:

- In "Horizontal" mode, you can turn pages using left to right swipe gesture. A fast and long gesture will start a fast scroll, whereas a simple tap will turn only 1 page.
- In "Vertical scroll" and “Auto scroll” modes, you can continuously scroll using a vertical swipe gesture
- In Horizontal scroll mode, when you zoom on a page, the next page is not zoomed. It allows you to quickly find the interest areas of the new page.
- In Vertical Scroll mode, the zoom level is always remembered when you move from page to page
- An interesting combination: double-tap on a paragraph to adjust the width (remove the margins), and then use vertical scrolling. If you don't like the fact that the Horizontal scrolling mode "forgets" the zoom when changing page, this combination may be the good one for you.

3.1.3 Using the reading functions

Many reading options have been thought to make your reading easier. The following table lists all of these options with their icons and explains how to use them:

Item	Function/Action
	Go back to the Books tab
Bookmark	To mark a page: click on the icon at the top right corner of the page The icon will change into and the page number will be added to the bookmark list To take a mark off, click on the bookmark icon again.
Sharing	To select the Mantano Cloud contacts of whom you want to display the annotations
Annotate	To take a text or sketch note. Tap this icon to call the next two icons below.
Draw	Create a sketch note. Referring to "3.1.4.1 Creating a freehand note"
Write	Create a text note, referring to "3.1.4.2 Creating a text note"
	Open the *Navigation* panel. You will see 4 tabs: TOC, Bookmarks, Highlights, Notes.

Navigation	The list of all the chapters, highlights, notes or bookmarks in the current eBook will be displayed, depending on the tab Click on the desired item to navigate to it
 Highlight	Refer to "3.1.3.3 Highlighting text in a PDF or an EPUB document"
 Theme	To select the theme you want to use or create or to edit a theme. You'll be able to change the fonts, line height, text alignment, text and background colors, margins and other…
 Text to speech	Click on it to listen to the current page. When the Text to speech function is running, the Text to speech header appears. See "3.1.3.4 Using the Text to Speech option"
 Dictionary	Open the dictionary search popup See Using dictionary and personal lexicon for details
 Search	See the 3.1.3.5 au-dessousLooking for a word in the book chapter for more information.
 Scroll	Open the scroll options pop up.

	 Auto: display pages in order to fit the screen NOTA: This option does not remove the original PDF margins
 Display settings	Open the *Display Setting*s popup. It allows you to set: crop, screen orientation, font size (ePUB only) and reflow mode (PDF only).
 Settings	Open the *Setting*s popup. Please refer to the "3.4 Setting my preferences" *section* to get more information.
 Information	Open the metadata Information popup and set the language, the author, the publisher, the title of the book and the book cover, the rating, the tags. Share the book with Mantano Cloud contacts.
 Crop	Please refer to the "3.1.3.7.1Using Crop Option" *section* to get more information

3.1.3.1 Night mode and custom themes

You can switch to night mode with a tap on the icon in the toolbar (or on the top right bar for Honeycomb devices).

You can also customize everything you want like fonts, margins, colors… For this, tap the Theme icon in the toolbar to open the Theme selection, then press the New button. When you've typed the name of a new theme, the customization screen appears.

3.1.3.2 Editing bookmarks to create your own Table of Content

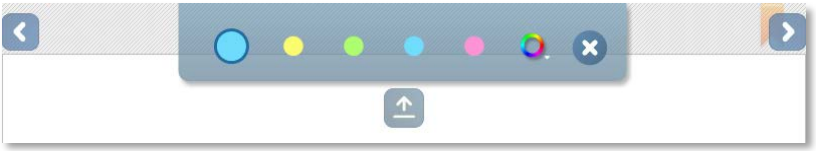
By default, bookmarks display the page on the book and the date that you created it. It you want to display your own title to use it as a custom Table Of Content item:

- Long press on the item in the notes panel
- Press the icon
- Enter your title
- Press the Ok button

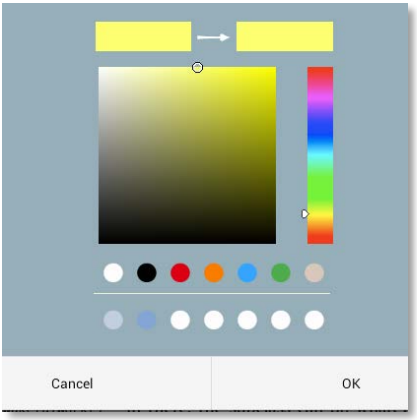
3.1.3.3 Highlighting text in a PDF or an EPUB document

3.1.3.3.1 To highlight

- Click on the toolbar icon to activate the highlight mode. The highlight panel appears under the header as shown below:



- Choose the color between all the colored disks displayed or using the icon to open the color chooser popup:



- Select the lines to highlight
- You can turn pages in highlight mode using the left and right arrow
- You can hide the panel staying in highlight mode using the icon
- To exit the highlight mode just use the close button

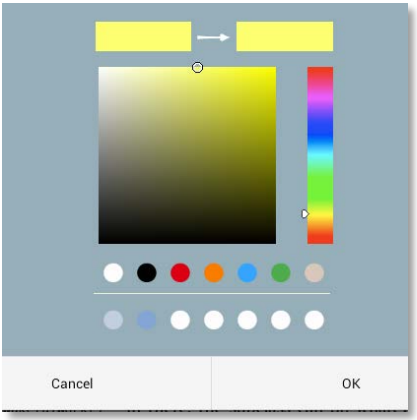
3.1.3.3.2 To edit the highlight

- Tap on a highlight
- The actions popup appears with all available actions in the highlight:

"The tales are *not* the same,"
insis d Armen. "Dragons in Asshai,
dragons in Qart , dragons in Meereen,
Dothraki dragons, dragons freeing

3.1.3.3.2.1 Changing the Color

- Select the icon
- Select the color you want in the color selector



- Validate

3.1.3.3.2.2 Text to speech

Select the icon

See "3.1.3.4 Using the Text to Speech option" for detailed description

3.1.3.3.2.3 Deleting

- Select in the popup
- Select OK in the confirmation alert Dialog

3.1.3.3.2.4 Adding a text note

- Select the and then the icon
- Use this option as described in the section "3.1.4.2 Creating a text note"
- After saving your note, you will see the icon on the top of the page. Its color is the same as the associated highlight.
- By clicking on the icon, you can edit it (see section "3.1.4.3 Editing a note")

3.1.3.3.2.5 Adding a graphical note

- Select the and then the icon
- Use this option as described in the section "3.1.4.1 Creating a freehand note"
- After saving your note, you will see the icon in the page as previously described.
- By clicking on the icon, you can edit it (see section "3.1.4.3 Editing a note")

3.1.3.3.2.6 Searching a word in a dictionary

- Select the icon
- Use this function as described in the section "3.1.5 Using the dictionary and the personal lexicon"

3.1.3.3.2.7 Sharing

- Select the icon

- Refer to Section "3.2 Sharing books, selected text and annotations through my other applications" for more information.
- Selecting text for copy, listening to it, search a word in the dictionary, highlight or share
- Long press on a word to enable the selection mode (a global setting allows you to choose if you want the device to vibrate or not when a long press occurs)

3.1.3.3.3 Selecting your text

A toolbar appears showing you some options like below:

"The tales are *not* the same,"
insis d Armen. "Dragons in Asshai,
dragons in Qart , dragons in Meereen,
Dothraki dragons, dragons freeing

By default, the most recently used type of highlighting type and color is selected. You can change the type of highlighting and color by pressing the corresponding options in the popup.

From a selection you can do other operations such as adding a note, sharing, searching for a word in the dictionary, listening to the excerpt, copying the selection or even removing highlight.

3.1.3.3.3.1 Copying text

- Select the icon
- The selected text has been copied to the Android clipboard

- It can be pasted in any text box with a long press

3.1.3.3.3.2 Listening to selected text

- See the section with the same name in “To edit the highlight” section

3.1.3.3.3.3 Searching the selected word in the dictionary

- See the section with the same name in “To edit the highlight” section

3.1.3.3.3.4 Adding a graphical note

- See the section with the same name in “To edit the highlight” section

3.1.3.3.3.5 Adding a text note

- See the section with the same name in “To edit the highlight” section

3.1.3.3.3.6 Sharing the note

- See the section with the same name in “To edit the highlight” section

3.1.3.4 Using the Text to Speech option

The text to speech function only works on PDF and EPUB files (it does not work on notes or word definitions). The icon for this function is:

When clicking on this icon, the audio options panel appears. By default, the whole text is read. If you have selected a text, only this text will be read.

At the end, the Text to Speech panel automatically disappears.

- You can change the text To Speech language thanks to the Languages Spinner.

- You can hide the panel by clicking on the up arrow.
- You can stop reading the text by clicking on the cross icon in the Text to Speech panel

There are 3 ways to use the text to speech function:

A. By clicking on the toolbar icon to listen to the current book.

B. By clicking on a highlight and then on the icon to listen to the highlighted text only

C. By clicking on the popup icon after selecting text to listen to the selected text only

3.1.3.4.1 When is the Text to Speech option available?

Text to speech option is available if:

- You have permissions to use it (in case of DRM protected books). To see the permissions you have on the book you can view the metadata information of the book by clicking on the icon.
- The current book has the language information set. You can do it on the Metadata Information Popup by clicking on the icon.
- A Text To Speech voice corresponding to the language of the book is installed on the device

3.1.3.4.2 In which languages can I use the Text to Speech option?

Text to Speech uses any of the preinstalled languages that come with the device. You can buy more languages on Google Play.

3.1.3.4.3 How can I customize the Text To Speech voices?

Text to Speech uses any of the preinstalled voices that come with the device. You can buy more voices on Google Play.

3.1.3.5 Looking for a word in the book

- Click on the standard “Search” button of your device (some devices do not have such a button) or on the “Search” button in the toolbar (or in the upper right corner on some devices). The search panel appears as shown below:

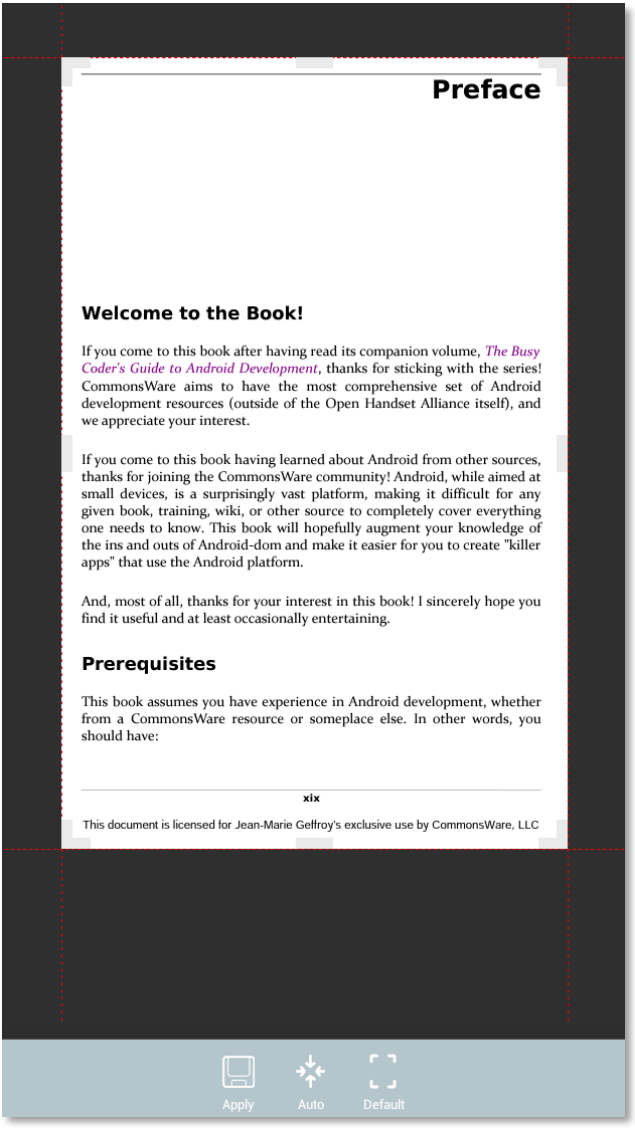
Reflow	Click on to dynamically reformat ("reflow") the text The text loses its layout (this option works pretty well on literacy books, but can give unexpected results in documents with complex page layouts such as technical books). Click on to cancel the reflow option and recover the original layout
Screen rotation	To select the screen orientation of the device: Automatic, Portrait, Landscape

Themes	To select the theme you want to use or to create or edit a theme

3.1.3.7.1 Using Crop Option

- Click on the icon in the toolbar



Preface
Welcome to the Book!
If you come to this book after having read its companion volume, The Busy Coder's Guide to Android Development, thanks for sticking with the series! CommonsWare aims to have the most comprehensive set of Android development resources (outside of the Open Handset Alliance itself), and we appreciate your interest.
If you come to this book having learned about Android from other sources, thanks for joining the CommonsWare community! Android, while aimed at small devices, is a surprisingly vast platform, making it difficult for any given book, training, wiki, or other source to completely cover everything one needs to know. This book will hopefully augment your knowledge of the ins and outs of Android-dom and make it easier for you to create "killer apps" that use the Android platform.
And, most of all, thanks for your interest in this book! I sincerely hope you find it useful and at least occasionally entertaining.
Prerequisites
This book assumes you have experience in Android development, whether from a CommonsWare resource or someplace else. In other words, you should have:
xix

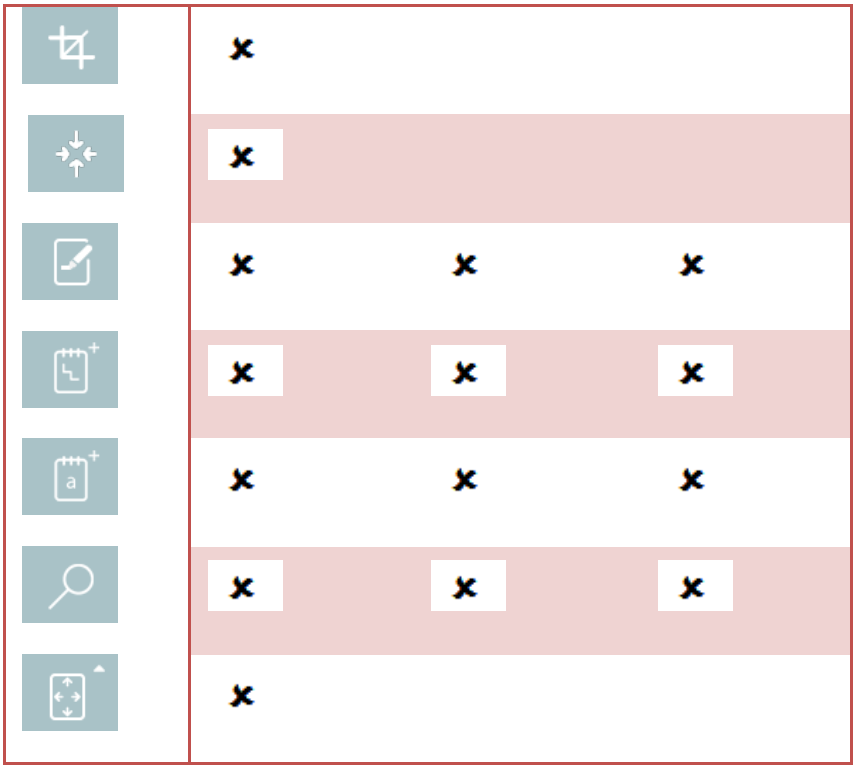
		✘	✘



Please note that for some protected PDF documents a password will be required to open.

3.1.4 Creating and editing a note

There are 3 different ways to create notes:

- From the reader: while you are reading an eBook or a document, click on the reader toolbar icons to create a note.

- From the Notes tab: if you want to create a note, go directly to this Notes tab; click on the or toolbar icons
- From a highlight in a PDF document (Text note only): click on highlighted lines. It opens a popup. Select the or the option

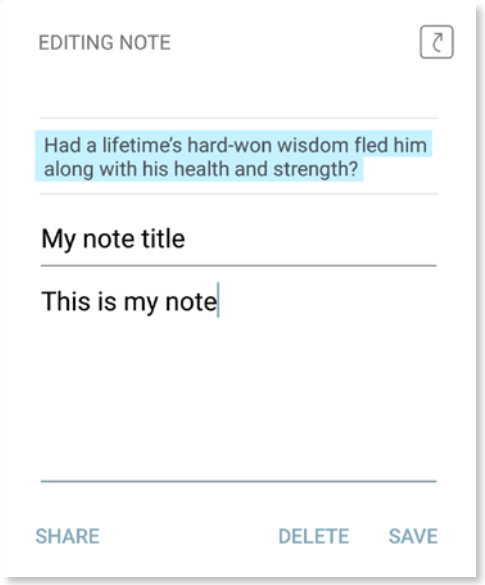
3.1.4.1 Creating a freehand note

- Click on to create a new freehand note
- From the toolbar choose the thickness of the line in the ***thickness*** popup opened with the toolbar icon
- Open the ***color chooser*** popup with the toolbar icon as shown below:

- Choose the color you want:
  - From the color selector by moving the selector circle and clicking on it
  - From the predefined colors by clicking on a colored disk
  - From your last used colors by clicking on the disks at the bottom
- Click on OK to validate the color
- Draw
- Save

3.1.4.2 Creating a text note

- Click on to open the Text Note edition popup:



- Enter a title on the Title input
- Click on the box underneath and enter your text note
- Click on the “Save” button

3.1.4.3 Editing a note

The following table lists all of the editing options with their icons and explains how to use them:

Item	Function/Operation
Delete	Remove the note

Open on reader	If the note is associated with a document, click on to open this document with the reader
Share	Open an applications list that allows sharing

3.1.5 Using the dictionary and the personal lexicon

3.1.5.1 Searching a word in dictionnaries

By default, you can search a word in 3 web dictionaries:

- Google
- Wikipedia
- Wiktionary

If ColorDict is installed on your device, you also can search a word in ColorDict.

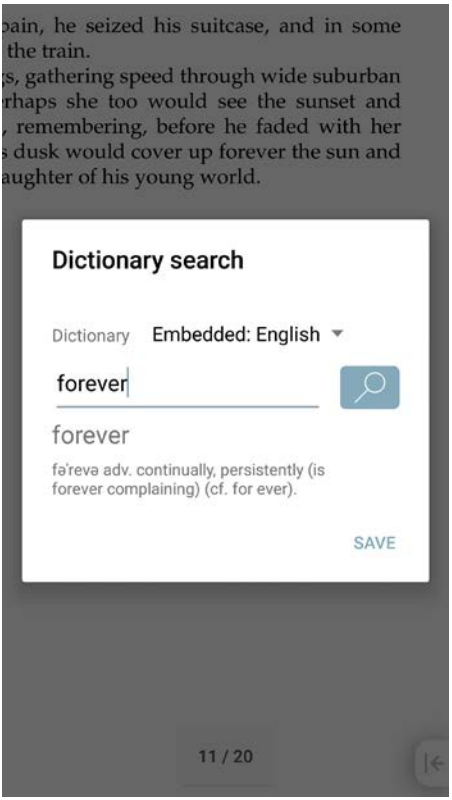
You can add embedded dictionaries in the Dictionaries section of the settings as described in the Setting my embedded dictionaries section.

There are 3 ways to open the dictionary search popup:

- By clicking on the toolbar icon
- By clicking on an highlight and then on the icon
- By selecting text in the book and then on the popup icon

Searching a word in the dictionary:

- Select your dictionary
- Type the word in the input area
- Click on the icon
- If the selected dictionary is embedded the definition of the word appears under the search area (Case 1), if it is remote the definition is displayed in an integrated web browser (Case 2), if you have selected ColorDict, the definition appears in a ColorDict window (Case 3)



pain, he seized his suitcase, and in some

Case 3: ColorDict

- In the Cases 2 and 3, go back.
- Click on the corresponding button to add the word in your personal dictionary if you want to have an easy access to it from your personal lexicon (definitions are included in Notes and you can access, export and share them from the Notes section).
- A message informs you that the word is correctly added

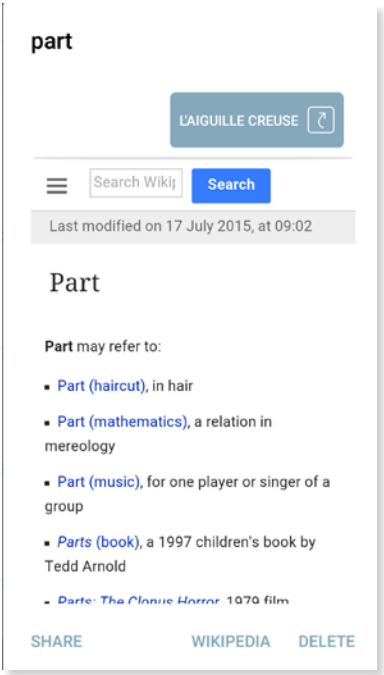
3.1.5.2 Setting my embedded dictionaries

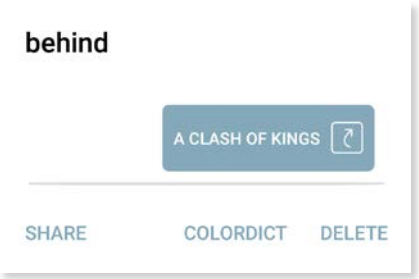
You can download embedded dictionaries in the global preferences. See the Downloading embedded dictionaries section in the next chapter.

3.1.5.3 Using my personal lexicon

You can see again the definitions you have added by activating the Notes tab and filter it by the type “Lexicon”.

- Click on a word in the list





Case 1 and 2: Embedded / Web

Case 3: ColorDict

- If the word has been searched inside a book, a button with the name of the book appears on the top. Click on it to open the book at the page where you have initiated your search.

3.2 Sharing books, selected text and annotations through my other applications

Thanks to the share icon, you can share books, text selections from books, notes and word definitions using one of your Android applications allowing you to share.

3.2.1 Sharing books

- Select one or more books
- Click on the Share icon in the Library, Lexicon or Notes list.
- Select the application you would like to use for sharing:
    - If you have selected more than one book, the books will be sent compressed in a zip file
    - A few applications allow you to share information as attached files

3.2.2 Sharing selected text or highlights

- Click on the Share icon in the text selection popup.
- Select the application you would like to use for sharing

3.2.3 Sharing notes

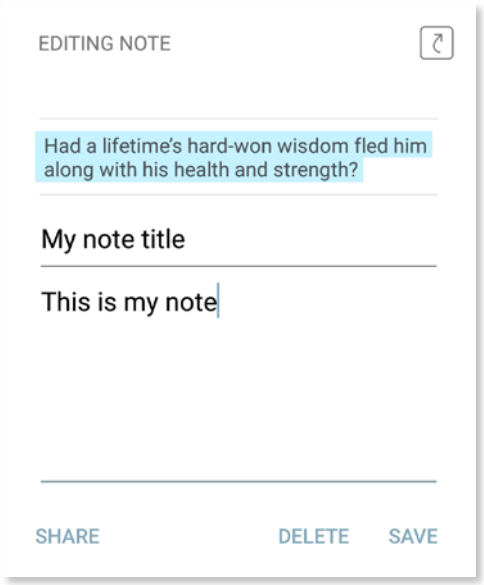
From the Notes list:

- Select one or more notes

- Click on the Share icon in the Notes tab.
- Select the application you would like to use for sharing:

From the Text Notes pop up:

- Click on the Share button on the Text note popup.



- Select the application you would like to use for sharing

3.2.4 Comment notes

You can add comments to a note or a highlight or by clicking on the icon from the navigation panel of the reader.

Notes

- Tap your comment and click on the “submit" button. Your comment will be added. It will be seen by all the users with whom the note was shared.

3.3 Exporting a note synthesis

In Notes, select one or several notes. Then you can see the icon Review sheet in the toolbar.

Tap this icon to display the review sheet to see how it looks like before sharing it. A pop up will ask you if you want to include the comments on the notes, if at least one of the selected notes has been commented.

3.4 Setting my preferences

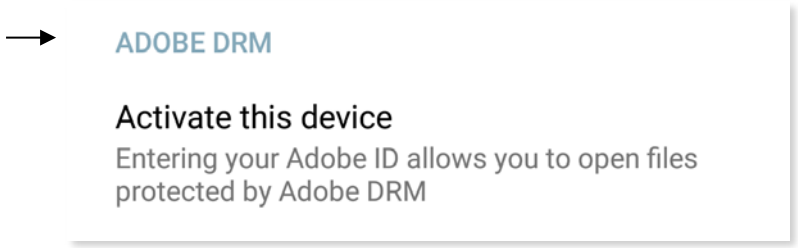
Click on the Preferences icon in the toolbar or in the action bar for tablets to go to the application preferences.

Preferences are organized in 5 sections:

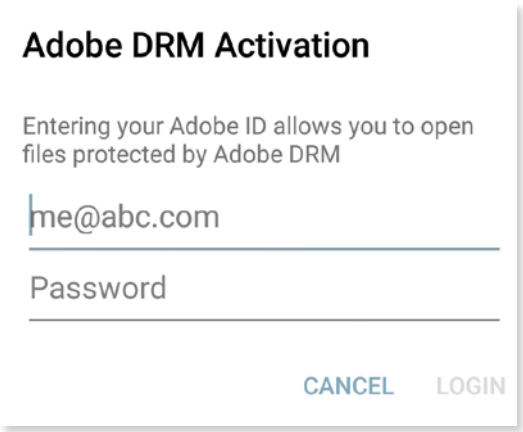
- Adobe DRM
- Options
    - My Books
    - Reader
    - Dictionaries
- User Interface
- Help
- About

3.4.1 Setting my Adobe Ids

- Click on the “Adobe DRM” item in the “Preferences” section

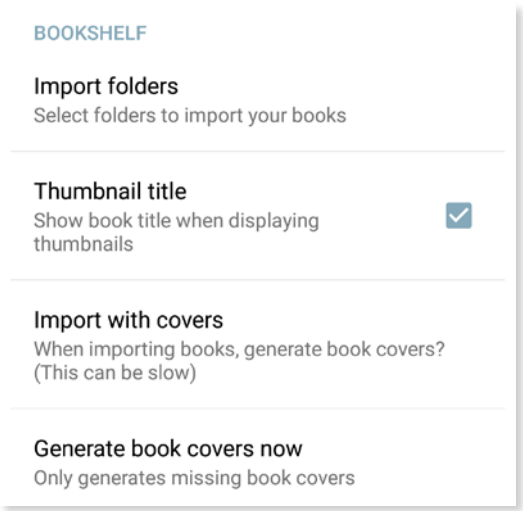


- Enter your Adobe ID and password



- Activate. The current Adobe ID is shown in the Adobe DRM Section. You can deactivate it by selecting the “Disable this account” option

3.4.2 Books settings



BOOKSHELF
Import folders
Select folders to import your books

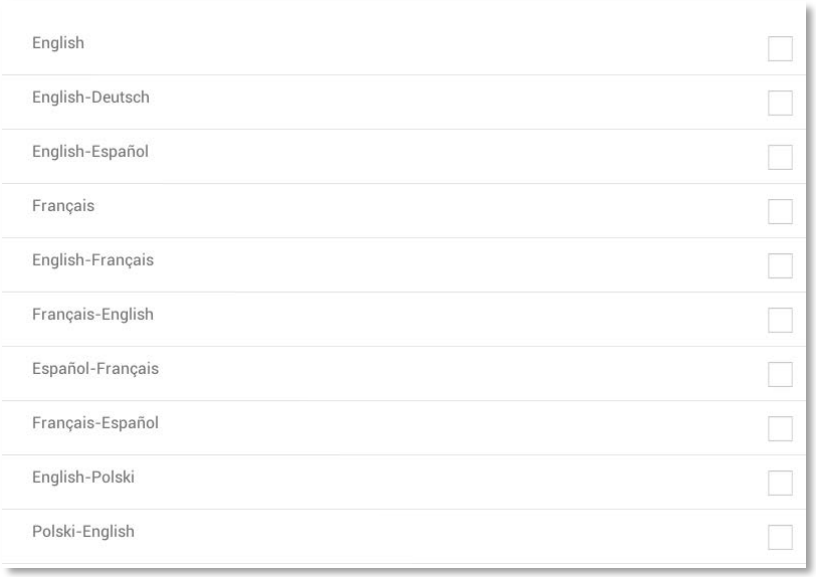
EPUB 2
Show page border
Show page border in EPUB files

- Select “Screen always on” if you want to disable the device’s automatic screen power off
- Select “Full-screen reading” to hide the status bar when reading
- Select “Vibrate” to provide feedback on text selection
- Select the screen orientation you want between Portrait, Landscape and Automatic (default)
- Select “Gestures” to change the predefined gesture actions
- Select “Keys” to change the predefined key actions

3.4.4 Dictionaries settings

3.4.4.1 Downloading embedded dictionaries

- Click on the “Dictionaries” item in the “Options” section of the Settings

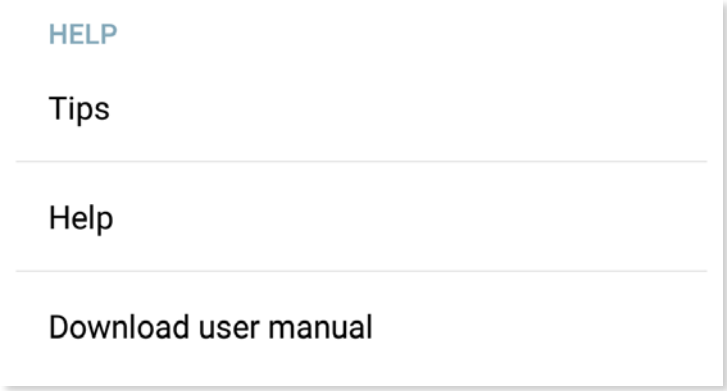


- Click on the icon to download the selected dictionaries

3.4.5 User interface settings

Click on “Expert mode” to hide the toolbar labels.

3.4.6 Do you need help using Mantano Reader?



You can also post your question into Mantano Support to Mantano Team and other users.

3.4.6.1 Using Mantano Support

Click on the “Help” section and go to Mantano Support, a support platform that allows you to:

- Access our **user guides**
- Post your question on the **community support** forum that best matches your problem depending on the software involved and the type of problem.

3.4.6.2 Downloading the latest user manual

- Click on the “Download User Manual” item in the “Preferences” section

We suggest to do it after every application update.

4 Mantano Cloud

Mantano Cloud makes it easy to read on the go, discuss with friends about your preferred excerpts from the latest best-seller, help each other to get a better understanding of some obscure passage, or do collaborative bibliographic research, directly from the books.

This service allowing you to:

- Back up all your important documents in a secured space
- Synchronize your Mantano Reader data between all your devices
- Read a book with your contacts (friends, classmates or colleagues), share your annotations and discuss about them inside the book
- Access your books and annotations from your personal space on cloud.mantano.com
- Manage the contacts that you will use to share your documents

4.1 Subscribing to Mantano Cloud

The steps of the registration to Mantano Cloud are the following:

1. Create a Mantano Cloud account
2. Sign up for the subscription of your choice according to your needs

4.1.1 Creating my Account

You can create your account from Mantano Reader or from Mantano Cloud.

1. Create your account from Mantano Reader or from Mantano Cloud:

a. From Mantano Reader: In the Settings, tap on 'Sync and back-up' in the Sync and back-up section.

b. From Mantano Cloud: go to cloud.mantano.com. On the home page of the website, click on the "+" sign on the Login panel and click on the « Join » button.

2. Complete your e-mail, pseudo and password in the registration form.

3. Validate. Within minutes you will receive a confirmation e-mail of your account in your mailbox.

4. Click on the link provided by this e-mail, your account will be activated from this moment.

4.1.2 Subscribing

1. Enter your pseudo and password in the login form

2. On the homepage of the website, click on « Evaluate for free » or « Subscribe »

3. Choose the formula which suits you best

4. Click on « Next »

5. Verify your Order information. If it's ok, click on the « Subscribe » button for payment through the Paypal system. You will be redirected in the paypal web-site

4.1.2.1 Paying through the Paypal system

6. Enter your email and password on the paypal website and click on the "Log in" button.

7. Check the Amount in the "Review your payment" page. If it's ok, click on "Agree and Pay". Your purchase will be completed. You can :

a. Go back to Mantano Cloud

b. Go to your Paypal account

8. If you choose the **a.** option and go to Mantano Cloud, you will see :

    a. Your payment information.

    b. Your subscription status. If your purchase is completed, you can enjoy the Mantano Cloud service.

4.2 How to start using Sync in Mantano Reader?

Mantano Reader automatically backs up your books and annotations on Mantano Cloud and synchronizes them between all your devices.

When you open a book that you are also reading on another device, it will be opened on the same last page that you opened, no matter the device on which it was. This allows you to easily resume where you left off regardless of which device you are using.

4.2.1 On device A (one of your devices)

1/ In Mantano Reader, configure your Mantano Cloud account:

- Go to the application settings or click on the “Refresh” button in the toolbar
- Enter your Mantano Cloud login and password by clicking on “Sync and sharing”
- The “Mantano Cloud account” screen is displayed with your Cloud information and options. Please read the default options carefully and change it if you want.

2/ In Mantano Reader, add books or annotations to the cloud:

- Select the books or annotations you want to upload to the cloud

- Click on “synchronize” (in the toolbar). This will mark the selected books as to synchronize.
    - The icon will be displayed on the top of the selected items. It means that the synchronization action is registered but not yet done.
    - If you want to force the synchronization, you can use the “Refresh” button in the toolbar.
        - Click on it with no books being selected
        - Books and annotations marked as synchronized will be uploaded, and books and annotations from the cloud will be visible on all your connected devices.
            - The icon is displayed on top of the items that are only available in the cloud (archived items)
    - When the synchronization will be done, the icon will be replaced by the icon.

4.2.2 On device B (another of your devices)

1/ In Mantano Reader, configure your Mantano Cloud account:

- Go to the application settings or click on the “Refresh” button in the toolbar
- Enter your Mantano Cloud login and password by clicking on “Sync and sharing”

- The “Mantano Cloud account” screen is displayed with your Cloud information and options. Please read the default options carefully and change it if you want.

2/ When you return to the library, you will be asked if you want to sync. Just select “YES” and all the changes on device A will be sent to device B.

4.3 In Mantano Cloud, show your documents and annotations:

You can now browse your library online through the web interface available at **http://cloud.mantano.com** (See description in the “4.5 Showing my books and annotations in Mantano Cloud” section)

4.3.1 Managing items in Mantano Cloud

4.3.1.1 Filtering the displayed items according to their status in Mantano Cloud

Each book or annotation can be in one of these synchronization status:

- Local : the book or the annotation exists on the device only
- Synchronized : the book or the annotation is on Mantano Cloud and on the device.
- Archived : the book or the annotation exists on the cloud only. This state is marked with the icon. When you open an archived book or graphical annotation, the files are automatically downloaded.
- Archived and DRM Protected : you need to download the book before opening it. When you try to open it for the first time, a popup invites you to download it from the store where you purchased it.

- Archived but book download needed : you need to download or buy a copy of the book before opening it. This concerns books shared by friends. When you try to open the book for the first time, a popup allows you to go to the direct link provided by your friend to get the book.

- Modifications made through the Web interface or from another device will be reflected for these items the next time that the device synchronizes. By default, it synchronizes every 30 minutes. This can be changed in the settings.

  Real-time synchronizations can also occur when you exit a book. If you are connected, the last read page and the book's annotations will be immediately visible on the cloud and downloaded on the other devices.

By default the application shows all the items in the library. You can use the "Cloud" button in the toolbar , to filter the items by status.

4.3.1.2 Synchronizing items to Mantano Cloud

Select the items you want and click on the "Synch" button and then on the "Synchronize" option . The file will be tagged as to be uploaded to Mantano Cloud and its status becomes "Synchronized".

4.3.1.3 Archiving items in Mantano Cloud

Select the items you want and click on the “Synch” button and then on the “Archive” option in the toolbar. The file will be uploaded to Mantano Cloud and deleted from the device. Its status becomes “Archived”

4.3.1.4 Removing items from Mantano Cloud

Select the items you want and click on the “Synch” button and then on the “Remove” option . The file will be deleted from Mantano Cloud and its status becomes “Local” if the item is synchronized and it just disappears if it was “Archived”.

4.3.1.5 Synchronizing reading status and annotations beetween devices for DRM protected books

The file containing a DRM protected book is associated with the device when you download it, and thus cannot be copied to another one. This is why you can’t use the cloud to send your DRM protected books to another device.

We cannot go against it, because it is to ensure compliance with copyright.

However, you can synchronize the reading status and annotations between devices for DRM protected books. For this you must:

- On device A (where you have the DRM protected book file)
    a. Select the book (Book A for our explanation)
    b. Tap on button and choose the "Synch" option
- On device B (another Device)

a. Tap on the “refresh” button

b. At the end of the sync, the Book A will be displayed on the “Books”

    i. The icon indicates that the book is protected and the file is missing.

c. Click on the book to open it, a popup asks you to download the book from where you bought it.

d. Do it and then import the book into your library. During the import, Mantano Reader will detect that it is the Book A.

    i. From that moment on, your reading status and your notes will be automatically synchronized between the two devices.

4.4 Setting the Synchronization options in Mantano Reader

Automatic Sync is enabled by default every 60 minutes. You can modify the synchronization frequency in the “Synchronization and Backup” section of the Settings. To manually sync, tap the center of your screen to activate the toolbar. Tap the “Refresh” button on the toolbar .

4.5 Showing my books and annotations in Mantano Cloud

To view your documents on Mantano Cloud you must enter your login and password in the login form.

Once you are logged in, you will see the following items from the main menu of the site:

- My Documents
- Notes

4.5.1 Using filters

The left sidebar provides direct links from a selection of filters for simple and powerful navigation.

- Choose the filter you want in the list of choices "by"
- Click on the item of your choice, the content area on the right will refresh

4.5.2 Showing and managing my books

From the cloud.mantano.com website you can for each book:

- Manage its tags
- Add to or delete from a collection
- Delete from Cloud
- Delete from everywhere : to delete the document from each one of your devices
- Download the file if you have synchronized it
- Show book annotations

4.5.3 Showing and managing my annotations

From the cloud.mantano.com website you can for each annotation:

- Manage its tags

- Add or delete from a collection
- Delete from Cloud
- Delete from everywhere : to delete the document from each one of your devices
- Edit text notes

4.6 Sharing books and social reading

4.6.1 Sharing and unsharing books

4.6.1.1 From Mantano reader

If you are logged into Mantano Cloud you will see under the tag icon of the detail view in the library:

- the inactive share icon if the book is not synchronized (you can only share synchronized books)
- the active share icon otherwise.

To share a book, click on the Share icon. In the sharing window you can:

- Indicate whether you have the rights or not to share the file
- Select or unselect contacts
- Enter the email address of someone who does not yet belong to your contacts:
    - Enter a valid email address in the « Invite by email » text field

- Touch the "+" button. The entered email is added at the top of your selected contacts

- Depending on whether you have the right to share the file or not
  - Validate if you have it
  - Press on the "Next" button to find the link to the book allowing your friend to download or purchase according to the case

Selected contacts will receive an email to notify them that you want to share a book with them. Sharing can be accepted or declined:

- From the Home Screen in their Mantano Reader App;
- From their personal space on the "Mantano Cloud" website.

When people have accepted your invitation (and downloaded the file if you do not have the right to share it or if the file is protected by DRM), they will be able to read the book and see your annotations and vice versa.

4.6.1.2 From the Mantano Cloud website

Make sure, you have at least one contact to share some books (See the "4.7 Managing my contacts / 4.7.1 Adding contacts" section below to see how to do it).

Go to the "My documents" section in your personal space on the Mantano Cloud web-site.

- Click on the share icon of a book
- On the "sharing popup":
  - To share a book with a contact, select him with the checkbox.
  - To un-share a book with someone, click on the contact name.
- Validate, the contact list near the share icon will be updated to reflect the changes
- The color of the contact's name indicates the sharing state

- The name is gray when the contact has not yet accepted the shared book
- It becomes black when the contact accepts the sharing

4.6.2 Seeing others' annotations while I read a book

By default, when opening the book you will only see your annotations. To see annotations of contacts that you have shared the book with:

- Click on the sharing icon, which can be found in the toolbar and in the navigation panel
- Select the people from whom you want to see the annotations
  - In the navigation panel, the list of items will be updated
  - In the book, others' annotations will appear differentiated with a sharing symbol

4.7 Managing my contacts

Go to the "My contacts" section in your personal space on the Mantano Cloud website.

This section contains all the contacts that have either accepted your invitation to become one of your contacts or who have also accepted at least one sharing of yours.

In this section you can:

- Delete one or more of the contacts
- Accept or reject friend requests
- Add contacts

4.7.1 Adding contacts

Click on the “Add contact” button on the top of the contacts page. In the text area, type the contacts’ email addresses that you want comma-separated, click on the “Invite” Button.

4.7.2 Accepting or declining friend requests

4.7.2.1 From Mantano Reader

Go to the "Home" screen:

- *On tablets: click on the Mantano Reader Logo*
- *On smartphones: click on the “Home” icon*

If you have some contact requests to accept, an icon is displayed on the top, near your pseudo. By clicking on it, you will see the pending list. You can accept or decline by clicking on the corresponding button.

4.7.2.2 From Mantano Cloud

Click on "My contacts" on your web space Mantano Cloud and on the "To accept" collection. Click on "Accept" or "Remove" for each contact or use the multiple selection.

4.8 Accepting or declining sharing

4.8.1.1 From Mantano Reader

Go to the "Home" screen:

- *On tablets: click on the Mantano Reader Logo*
- *On smartphones: click on the “Home” icon*

If you have some shared reading to accept, a specific section is displayed on the center of the screen.

An icon indicates if your friend has the necessary rights to include the book copy in the sharing:

- A book copy is included
- No book copy is included. You must also get the book (if you have not already done so) to be able to get into the shared reading.

You can accept or decline by clicking on the corresponding button.

- When you accept the file the book is automatically added to your Library
    - In the library, if the copy is not included, the icon indicates that you need to download or buy a copy of the book before opening it.

      When you try to open it, a popup allows you to go to the direct link provided by your friend to get the book.

4.8.1.2 From Mantano Cloud

Click on "My documents" on your web space Mantano Cloud and on the collection "Pending shared items" . Click on "Get" or "Decline" for each document or use the multiple selection.
